

## 8.2MHz Retail Anti-Theft Hard Tag

This 8.2MHz hard tag is designed for retail security. It is used to protect merchandise from theft in retail environments.

### ADDITIONAL IMAGES

### Product Overview

#### High-Efficiency Retail Security Solution

The T003 Mini Alpha hard tag is a cost-effective and highly versatile anti-theft solution designed for modern retail environments. Operating at a standard 8.2MHz frequency, it provides reliable protection for a wide range of merchandise while remaining compact and unobtrusive. Its robust construction ensures durability against tampering, helping retailers significantly reduce inventory shrinkage and labor costs.

## Technical Specifications

### Application

### Operating Frequency

**8.2 MHz**

Frequency

### Unit Dimensions

50mm Diameter x 26mm

### Tag Style

Round / Mini Alpha

### Locking Mechanism

Magnetic Locking with high-quality iron prop

### Available Colors

Grey, White, Customized

## Key Features & Benefits

### How to use?

### Performance Highlights

- Quick application and removal to reduce labor costs by up to 70%
- 3-in-1 design for efficient storage
- Small, light, and highly versatile form factor
- Compatible with HD lanyards for flexible attachment
- High-durability construction using new raw materials

## Durability & Quality

### 3 Product testing

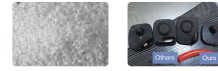

Even if throwing the tag hard, it will be intact. In addition, even a person with weight nearly 135kg steps on the tag, it is still intact.

### Product quality display

#### HOW ARE WE DIFFERENT?

##### 1 Use of high quality raw materials

Some companies use recycled materials, but we all use high quality raw materials to ensure the quality.

##### 2 High quality internal materials

Dragon Guard use high quality material and price is stronger than iron sheet lock, different length of bars are available.

## Industrial-Grade Resilience

This hard tag is engineered to withstand extreme physical stress. Testing shows the tag remains intact even when thrown forcefully or subjected to the weight of a person weighing nearly 135kg. The internal mechanism utilizes a thick iron prop rather than a standard iron sheet lock for superior security.

## Applications

### Key Features

- Quick application and removal
- Reduces labor costs up to 70%
- 3-in-1 design for easy storage
- Small, light and highly versatile
- Available with HD lanyard

### Common Applications

- Handbags
- Footwear
- Belts
- Accessories
- Outerwear
- Sporting goods
- Hardware

### Ideal For

Handbags • Footwear • Belts • Accessories • Outerwear • Sporting Goods • Hardware
