

850mAh Ni-MH Rechargeable Battery 3.6V

This is a rechargeable Ni-MH battery with an 850mAh capacity and 3.6V voltage. It provides a reliable power source for various electronic devices.

Overview

Reliable Power Solution

This 3.6V Ni-MH rechargeable battery offers a dependable 850mAh capacity, making it an ideal power source for various electronic devices. Designed for consistent performance, it provides a stable energy output suitable for applications requiring reliable rechargeable power. Its compact design and standard chemistry ensure compatibility with a wide range of compatible hardware.

Technical Specifications

Capacity

850 mAh
Capacity

Nominal Voltage	3.6 V
Battery Chemistry	Ni-MH
Country of Origin	China
Key Features	Rechargeable, Ni-MH Technology
