Overview

High-Performance Power Solution

This 8.5kW gasoline generator is engineered for reliability and durability, featuring a high-performance 459cc engine delivering 16HP. Built with a 100% copper alternator for improved temperature management and a robust 32mm protective frame, it is designed to withstand demanding work environments. With a large 30L fuel tank, it provides extended operation, making it an ideal choice for professional and home power needs.
