

899cc Inline-Three Motorcycle Engine

This high-performance naked motorcycle engine features a liquid-cooled, 899cc inline three-cylinder design. It delivers a potent combination of torque and horsepower, making it suitable for both urban riding and spirited canyon carving.

Overview

High-Performance Inline-Three Engine

This 899cc liquid-cooled, inline three-cylinder engine is engineered for high-performance applications, delivering a potent balance of torque and horsepower. Designed to support agile handling and spirited riding, it integrates seamlessly with advanced chassis components like trellis frames and adjustable suspension systems. This powerplant provides a compelling solution for manufacturers seeking a visually striking and responsive engine platform.

Engine Specifications

Displacement	899 cc
Cylinder Configuration	Inline-three
Cooling System	Liquid-cooled

Performance Features

Key Performance Metrics

899 cc
Displacement

Chassis Compatibility

Compatible Chassis Components

- Trellis frame
- Adjustable front fork
- Rear monoshock
- High-spec disc brakes

Design

Design Characteristics	Aggressive Styling, Minimalist Design, High-Performance
