

# 8kW Three-Phase Solar Inverter with WiFi/GPRS

This 8kW three-phase solar inverter is designed for solar systems and ensures reliable grid synchronization. It features WiFi/GPRS connectivity and DC input for efficient energy conversion.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Energy Conversion

This 8kW three-phase solar inverter is engineered for robust solar energy systems in both residential and commercial environments. It features seamless integration with DC inputs for solar panels and reliable AC grid synchronization. With advanced built-in WiFi and GPRS connectivity, it provides professional-grade remote monitoring of energy production and system performance.

## Technical Specifications

### Rated Power Output

**8 kW**

Rated Output Power

### Phase Configuration

Three-Phase

## Connectivity & Monitoring

### Monitoring Capabilities

- Remote energy production tracking
- Real-time system performance monitoring
- Integrated remote control capabilities

### Supported Connectivity

WiFi, GPRS

## Application

### Recommended Applications

Residential • Commercial
