

8mm Feeder Tape Guide for SMT Placement Machines

This 8mm feeder tape guide is designed for SMT pick and place machines. It is made of metal to ensure durability.

Product Overview

Precision Feeder Tape Guide

This 8mm feeder tape guide is a critical component designed for high-precision SMT placement machines. It ensures accurate and reliable tape feeding during the component assembly process, directly contributing to the efficiency and precision of your production line. This part is compatible with specified feeder systems and supports a range of common electronic component sizes.

Compatibility & Identification

Part Numbers

- N210103441AB
- N210103441AA
- KXF0E0T9A01

Compatible Machines

CM402, CM602

Technical Specifications

Supported Components

0805, 0603, 0402

Tape Width

8 mm

Handling & Maintenance

Important Handling Notice

This precision component requires careful handling to ensure optimal performance. Avoid dropping or subjecting the product to mechanical shock, as this may compromise its operational integrity and functionality.
