

## 8x4mm SMT Feeder Parts with 15-inch Tail

SMT feeder parts designed for 8x4mm components with a 15-inch tail. This precision-engineered component is essential for efficient and reliable SMT assembly processes.

### Overview

#### Precision SMT Feeder Component

This 8x4mm SMT feeder part is precision-engineered to facilitate efficient and reliable component feeding in surface mount technology assembly processes. It is designed to ensure accurate positioning and seamless placement operations for high-quality electronic manufacturing. With its robust construction and 15-inch tail, it provides a stable solution for critical SMT placement machine workflows.

### Technical Specifications

Component Width	8 mm
Component Pitch	4 mm
Tail Length	15 inch

### Safety and Compliance

Handling Warning	Do Not Disassemble
