

# 9 5/8 inch Carbon Steel Casing and Tubing

9 5/8 inch carbon steel tubing and casing conforms to API 5CT standards. It is suitable for oil and gas transmission.

## Product Overview

High-quality carbon steel casing pipes manufactured to API 5CT standards for oil and gas transmission.

### High-Performance API 5CT Casing & Tubing

This 9 5/8 inch carbon steel casing and tubing is engineered for demanding oil and gas transmission and water well applications. Manufactured to API 5CT standards, it supports a wide range of steel grades including J55, K55, N80, L80, and P110 to ensure structural integrity in diverse geological conditions. The seamless design and specialized connection types provide reliable fluid conveyance and long-term durability for professional oilfield operations.

## Technical Specifications

Reliable seamless tubing available in multiple grades including J55, K55, N80, and L80.

### Standard Compliance

API 5CT • ISO

### Featured Diameter

**9.625 inch**

Outer Diameter

### Available Steel Grades

H40, J55, K55, M65, N80, L80, P110, Q125

### Size Range

2 3/8 inch - 20 inch

## Connections & Construction

### Tubing Connection Types

- EUE (External Upset End)
- NUE (Non-Upset End)

### Casing Connection Types

- STC (Short Thread Connector)
- LTC (Long Thread Connector)
- BTC (Buttress Thread Connector)

## Manufacturing Tolerances

### Dimensional Tolerances

| Item                | Specification       | Tolerance     |
|---------------------|---------------------|---------------|
| Outer Diameter (OD) | D < 114.3mm         | ±0.79mm       |
| Outer Diameter (OD) | D e 114.3mm         | +1%D / -0.5%D |
| Wall Thickness (WT) | All sizes           | -12.50%       |
| Weight              | Single Lengths      | +6.5%, -3.5%  |
| Weight              | Carload e 18,144 kg | -1.75%        |

## Quality Control

### Inspection & Testing

- Raw material testing
- Dimension and slot size check
- Hole size verification
- Wall thickness inspection
- Material composition verification

## Logistics & Packaging

### Packaging Options

- Thread protectors
- Steel strip bundling
- Bubble bag protection
- Woven bag packaging
- Wooden strip reinforcement

### Available Shipping Modes

Sea Freight (Large Capacity), Air Freight (Quick Delivery), Complete Package (Low Cost)
