

9 5/8 Inch Stainless Steel 316L Wire Wrap V-Shaped Screen Pipe

This base screen pipe features a perforated pipe inside, wrapped by an outer Johnson type screen. The screen jacket and base pipe are welded together with a coupling.

Product Overview

High-Performance Well Screen Technology

This 9 5/8-inch wire wrap screen pipe is engineered for demanding oil and water exploitation environments. Featuring a robust Johnson-type screen jacket over a perforated base pipe, it ensures efficient filtration and durability. The design utilizes a V-shaped wire profile to minimize clogging and maximize flow, making it ideal for critical industrial applications.

Technical Specifications

Connection Types

- STC (Short Threaded Coupled)
- LTC (Long Threaded Coupled)
- BTC (Buttress Threaded Coupled)

Nominal Pipe Size

9.625 inch
Diameter

Base Pipe Material

304, 304L, 316, 316L

Screen Construction

Johnson type screen (Multilayer)

Logistics & Handling

Packaging Details

Bubble bag protection with wooden support wrapping
