

9 HP Diesel Power Tiller Cultivator

This 9 HP diesel power tiller cultivator is designed for efficient soil cultivation. The cultivator features adjustable tilling depth and width, providing versatility for different soil types and applications.

Overview

Robust Agricultural Performance

The PP-135 diesel power tiller is a high-performance agricultural machine designed for efficient soil cultivation in small to medium-sized farms and gardens. Powered by a reliable 406cc diesel engine, it offers significant power for demanding tilling tasks. Its adjustable depth and width settings, combined with sharp, durable tines, ensure optimal soil aeration and preparation for planting.

Engine Specifications

Engine Model	186F
Engine Type	Diesel, 4-stroke, Air-cooled
Displacement	406 cc

Performance Metrics

Power Output

9 hp Max Output	8.6 hp Rated Power
---------------------------	------------------------------

Fuel Consumption	d0.8g/666.7l
Rotary Tilling Productivity	666.7-1333.4j/h

Tilling Capabilities

Tilling Dimensions

Parameter	Value
Tilling Depth	12-30 cm
Tilling Width	135 cm
Blade Diameter	35 cm
Min. Blade Distance	30 cm

Physical Dimensions

Overall Dimensions (LxWxH)	180cm x 135cm x 110cm
Wheelbase	50 cm
