

# 9 HP Diesel Rotary Tiller

This rotary tiller is equipped with a 9 HP diesel engine for powerful soil cultivation. It offers adjustable tilling width and depth for customized soil management.

## Overview

RV1350-0103R technical overview and specifications guide

### Robust Soil Preparation Solution

The RV1350-0103R is a heavy-duty diesel rotary tiller designed for professional soil cultivation and agricultural preparation. Equipped with a 9 HP engine and a gear-driven transmission, it offers reliable power for efficient field management. Its adjustable tilling width and depth capabilities, combined with an ergonomic, user-friendly design, ensure precision and comfort during extended operation.

## Engine Specifications

### Engine Performance Metrics

<b>9 hp</b> Max Power	<b>25 N.m</b> Max Torque	<b>406 ml</b> Displacement
--------------------------	-----------------------------	-------------------------------

### Engine Technical Details

- Model: 186 Diesel engine
- Type: Single cylinder, four-stroke cycle, air-cooled

## Operation & Capability

### Tilling Capacity

Metric	Range
Tilling Width	800-1350 mm
Tilling Depth	e100mm

### Transmission System

Gear-driven with shifting options: -1, 0, 1, 2

## Logistics & Physical

### Weight Specifications

**140 KG**

Net Weight

**155 KG**

Gross Weight

### Available Colors

Red, Orange, Green, Blue, Yellow, Army, White
