

9 HP Horizontal Gas Engine

This gasoline engine starts quickly with a simple pull and provides steady, reliable power for long-term operation. The advanced OHV design enhances overall engine performance, reduces oil and fuel consumption, and extends engine life.

Overview

High-Performance Horizontal Gas Engine

This 9 HP horizontal gas engine is engineered for reliability and consistent performance in demanding applications. Featuring an advanced OHV design, it optimizes fuel and oil consumption while ensuring durability for an extended service life. The unit offers versatile starting options and is designed to provide dependable power for equipment such as generators and water pumps.

Performance Metrics

Maximum Output

9 HP Max Power	4000 RPM Rated Speed
--------------------------	--------------------------------

Maximum Torque	1.95 kg/m
----------------	-----------

Technical Specifications

Displacement	270 cc
Compression Ratio	8.2:1
Ignition System	TCI
Air Cleaner Type	Dual silent (Semi-dry)

Operational Features

Starting System	Recoil, Electric (Optional)
Noise Level	81 dBA

Dimensions & Capacity

Dimensions (L x W x H)

Metric	Value
Net Weight	25 kg
Dimensions (mm)	380 x 430 x 410

Fuel Tank Capacity	6 L
Oil Capacity	1.1 L
