Product Overview

High-Performance 9-Inch Angle Grinder

This professional-grade 9-inch angle grinder is engineered for heavy-duty cutting and grinding tasks in construction and metalworking environments. It features a robust 2600W motor capable of handling significant overload demands up to 4000W. Designed for longevity, the tool incorporates advanced dust protection and anti-leakage structures to ensure reliable operation under demanding conditions.

Technical Specifications

Rated Power	2600 W
Overload Capacity	4000 W
Disc Diameter	9 inch

Key Features

Durability Enhancements

- Labyrinth dustproof design on bearing block
- Effective coating for motor dust protection
- Anti-oil leakage O-ring structure for gear protection

Performance Technology

Soft Start, High Overload Ability
