

9-Inch Circular Saw with 40-Tooth Blade

This circular saw is a power tool designed for making precise cuts in various materials. It features a high-speed rotating blade with 40 teeth, capable of reaching a maximum speed of 6500 RPM.

Product Overview

High-Performance Circular Saw

This 9-inch circular saw is engineered for demanding cutting tasks, offering a powerful 2560W motor for consistent performance. Designed with precision in mind, it features a 40-tooth blade capable of delivering clean, accurate cuts across various materials. Its robust construction and user-focused design ensure reliability and control for professional applications.

Technical Specifications

Rated Input Power	2560 W
No-Load Speed	4200 r/min
Blade Diameter	235 mm
Net Weight	7.8 kg

Key Features

Performance Highlights

2560 W

Power Output

40 T

Blade Teeth

Key Attributes

9-Inch Blade, 20mm Arbor, High Torque
