

9-Inch Reinforced Grinding Wheel - A24R-BF

Reinforced grinding wheel designed for stainless steel and steel applications. It measures 230x6.0x22.2 mm (9"x1/4"x7/8") and has a maximum RPM of 6600-80m/s.

Product Overview

Professional Grade Grinding Performance

This 9-inch reinforced grinding wheel is engineered for demanding grinding tasks on stainless steel and standard steel applications. Built to Type 27 specifications, it offers the structural integrity required for heavy-duty industrial use. The wheel adheres to strict EN 12413 safety standards and ISO 9002 quality certifications, ensuring consistent performance and operator safety.
