

9 Input 16 Output Cascade Satellite Multi-switch

This cascade multiswitch is made with anti-rust material and comes with a good quality power adapter. It features 9 inputs and 16 outputs, allowing for cascading to expand distribution networks.

Product Overview

Professional Satellite Distribution

This 9-input, 16-output multiswitch is designed for robust satellite signal distribution in multi-user environments. Supporting both cascade and end-type configurations, it allows for scalable network expansion to meet various installation requirements. The unit is compatible with standard satellite control protocols, ensuring reliable signal routing from multiple sources to numerous subscriber outputs.

Technical Specifications

Input Configuration

8 ports

Satellite Inputs

1 ports

Antenna Input

Subscriber Outputs

16 outputs

Control Commands

13/18V, 0-22KHz, DiSEqC 1.0, DiSEqC 2.0

System Features

Power Supply

- Satellite receiver powered
- External power supply supported

Installation Type

Cascade Type • End Type
