

9 Input 24 Output Satellite Multiswitch

Satellite multiswitch distributes satellite and terrestrial signals. It features 9 inputs and 24 outputs, supporting a wide frequency range for both SAT and ANT signals.

Product Overview

High-Performance Satellite Distribution

The MS-9924LC is a professional-grade cascadable multiswitch designed for efficient signal distribution in multi-dwelling units and large residential complexes. Featuring 9 inputs and 24 outputs, it seamlessly manages satellite and terrestrial signals to ensure consistent, high-quality reception for every subscriber. The unit supports flexible signal selection via standard control commands and includes a built-in amplifier to minimize signal loss across long cable runs.

Technical Specifications

Input Configuration

8 ports Satellite Inputs	1 ports Terrestrial Input
------------------------------------	-------------------------------------

Subscriber Outputs	24 outputs
Signal Selection Methods	13/18V, 0-22KHz, DiSEqC 1.0, DiSEqC 2.0

Installation & Compatibility

Device Type

Cascadable • High-Performance

Power Supply

- Satellite receiver powered
- External power supply
