

9 m3 Capacity Concrete Mixer Truck

This concrete mixer truck has a mixing capacity of 9 m3 and ensures a surplus rate of less than 1%. The hydraulic system provides reliable mixing performance.

Overview

High-Efficiency 9 m³ Concrete Transport Solution

This heavy-duty concrete mixer truck is engineered for high-capacity transport and consistent mixing on demanding construction sites. Featuring a robust chassis and a powerful engine, it ensures reliable operation for large-scale infrastructure projects. The advanced hydraulic systems provide precise control over drum rotation and discharge, guaranteeing a homogeneous mix and efficient delivery every time.

Performance Metrics

Key Performance Metrics

9 m³

Mixing Capacity

Technical Specifications

Mixing Drum Features

- High-capacity mixing volume
- Optimized drum design for homogeneous mixing
- Hydraulic rotation control
- Precise discharge control system

Chassis & Build

Construction Quality

Heavy-Duty Chassis, Durable Construction, Advanced Engineering, Robust Frame

Operation & Maintenance

Operational Features

- Easy-to-use operator controls
- Efficient maintenance access
- Hydraulic discharge mechanism
- Reliable engine performance

Application

Primary Applications

Large-scale Projects • Demanding Construction Sites • Infrastructure Development • Concrete Transport
