

90-Degree Brass Push-to-Connect Connector

This brass connector facilitates 90-degree connections in pneumatic and fluid systems. It features push-to-connect fittings for easy installation and secure, leak-proof performance.

Overview

High-Performance 90-Degree Connector

This 90-degree brass push-to-connect connector is engineered for efficient fluid transfer and pneumatic applications. Its robust brass construction offers superior rust and wear resistance, ensuring long-term reliability in demanding industrial environments. The intuitive push-to-connect design facilitates quick, leak-proof installations, making it an ideal solution for space-constrained automotive and automation systems.

Technical Details

Material Composition	Brass
Connection Type	Push-to-connect
Configuration	90-degree elbow

Performance Features

Key Benefits	Rust Resistant, Wear Resistant, Leak-proof, Easy Installation
--------------	---

Application

Common Industries

- Automotive
- Industrial Systems
- Automation Systems
- Pneumatic Applications
