

90-Degree Corner Clamp

This corner clamp is designed to hold workpieces at a 90-degree angle. It features adjustable clamping mechanisms for precise and secure positioning of materials, suitable for woodworking and metalworking.

Product Overview

Precision Corner Alignment

This 90-degree corner clamp is a versatile tool engineered for accurate workpiece alignment in woodworking and metalworking projects. Featuring a robust metal construction with a durable finish, it ensures reliable performance and secure holding power. The adjustable clamping mechanism, equipped with T-handles, allows for precise positioning, making it an essential addition to any professional workshop.

Technical Specifications

Clamping Angle	90 degrees
Material	Metal
Mounting Options	Yes

Features

Key Features

- Adjustable clamping mechanism
- Threaded rods for precise tension
- Ergonomic T-handles with grips
- Mounting holes for work surface security

Applications

Suitable For	Woodworking, Metalworking, Carpentry, Fabrication
