

90-Degree Corner Connector for Pipes/Rods

This 90-degree corner connector joins pipes or rods at a 90-degree angle. Its robust construction ensures structural integrity and precise alignment.

Product Overview

Robust 90-Degree Corner Connector

This 90-degree corner connector is engineered for high-precision joining of pipes or rods in structural applications. Featuring a durable metallic construction with a professional brushed finish, it ensures reliable alignment and structural integrity. The design includes integrated end caps with sealing gaskets, making it an ideal choice for demanding industrial or architectural assembly requirements.
