

90 Degree Grease Gun Coupler

This 90-degree grease gun coupler is designed for grease and lubrication applications. It features durable construction for reliable performance.

Product Overview

Professional 90-Degree Grease Coupler

This 90-degree grease gun coupler is engineered for efficient lubrication in confined spaces where standard straight couplers cannot reach. Designed for reliability and ease of use, it ensures a secure connection to grease fittings, minimizing leakage during operation. Its robust construction makes it an essential tool for maintenance professionals working with heavy machinery and automotive equipment.

Technical Specifications

Design Features

- 90-degree angled head for difficult access
- Side sleeve coupling mechanism
- Durable construction for long-term use

Angle	90 Degrees
Application	Grease Application, Lubrication, Maintenance
