

90-Degree Malleable Iron Pipe Elbow

This 90-degree elbow pipe fitting is made of malleable iron. It provides a durable, corrosion-resistant connection for fluid or gas transfer in plumbing and industrial applications.

Product Overview

High-Performance Pipe Connection

This 90-degree elbow pipe fitting is engineered from durable malleable iron, designed to provide a secure and reliable connection for piping systems. It features precision-threaded ends, ensuring a tight seal for fluid or gas transfer in demanding industrial and plumbing applications. Its robust construction offers excellent resistance to corrosion, making it a dependable choice for long-term infrastructure maintenance.

Technical Specifications

Key Features

- Corrosion-resistant material
- Durable malleable iron construction
- Precision-threaded ends

Fitting Angle	90 degrees
Material	Malleable Iron
Connection Type	Threaded
Suitable Applications	Plumbing, Industrial Piping, Fluid Transfer, Gas Transfer
