Overview

Versatile 90 HP Wheel Tractor

This 90 HP wheel tractor is engineered for dry land and multifunctional agricultural applications. Utilizing advanced European technology, it features a high-torque engine and a synchronized 16F+8R transmission for smooth operation. With a robust chassis, strengthened front axle, and multiple configuration options, it is designed to meet the diverse needs of modern farming operations.

Performance

Key Performance Metrics

90 HP

Power Output

35 %

Torque Reserve

21.3 kN

Traction Force

Maximum Lifting Force

20 kN

Technical Specifications

PTO Specifications

- 6/8/21 splines switchable
- Rotation speed: 540/1000 RPM

Transmission

Synchronizer 16F+8R

Fuel Tank Capacity

145L (Optional 90L iron tank)

Hydraulic System

Two-way output (three-way available)

Features & Compliance

International Certifications

OECD • EAC • E-mark

Optional Features

Internal air filter, External air filter, Single pipeline air brake, Double pipeline air brake, Double cylinders high pressure lifter
