

9000-28000 BTU Air Conditioning Unit

This air conditioning unit supports both R410A and R22 refrigerants. It features ON/OFF and DC Inverter technology, providing precise temperature control and energy savings with a capacity ranging from 9000 BTU to 28000 BTU.

Overview

Versatile Climate Control Solution

This high-performance air conditioning unit offers a flexible cooling capacity range from 9000 BTU up to 28000 BTU, making it an ideal choice for a variety of residential and commercial spaces. Featuring both ON/OFF and advanced DC Inverter technologies, the system ensures precise temperature management and significant energy efficiency. Its design focuses on ease of installation and maintenance, providing a reliable, compact solution that integrates seamlessly into existing HVAC environments.

Technical Specifications

Capacity Range

9000 BTU

Minimum Capacity

28000 BTU

Maximum Capacity

Technology Type

ON/OFF • DC Inverter

Compatible Refrigerants

R410A, R22

Application

Suitable Environments

- Residential
- Commercial
