

900W Electric Tarp Motor for Dump Trucks

This 900W electric motor is designed for operating dump truck tarp systems. It features a 60:1 gear ratio, providing high torque and reliable performance for heavy-duty tarp deployment and retraction.

Overview

High-Performance Tarp Motor

This 900W electric motor is engineered specifically for dump truck tarp systems, providing the high torque needed for reliable operation. Featuring a robust 60:1 gear ratio, it ensures smooth and consistent tarp deployment and retraction in demanding environments. The unit comes complete with a protective chrome cover, making it a durable and efficient solution for heavy-duty commercial vehicles.
