

# 900W Parabolic Space Heater with Adjustable Height

This parabolic heater uses a halogen/quartz tube to deliver up to 900W of power. It offers three heating settings and an adjustable height for customized comfort.

## Product Overview

### Efficient Parabolic Heating

This 900W parabolic space heater is engineered for focused, efficient warmth in both residential and office environments. Utilizing advanced parabolic reflector technology, it concentrates heat output to provide immediate comfort where it is needed most. With adjustable height settings and multiple heat levels, users can easily customize their heating experience to suit various room layouts and personal preferences.

## Technical Specifications

### Power Rating

**900 W**

Power Output

### Heating Technology

Parabolic Reflector

## Features & Safety

### Adjustability

- Adjustable height
- Multiple heat settings

### Safety Features

Tip-over switch, Overheat protection

## Applications

### Ideal Usage

Home • Office • Supplemental Heating
