

# 90cc Cast Aluminum Cylinder Head

Cast aluminum cylinder head designed for 90cc engines. It features a central combustion chamber, intake and exhaust ports, and cooling fins for efficient heat dissipation.

## Product Overview

### High-Performance 90cc Cylinder Head

This cast aluminum cylinder head is precision-engineered for 90cc small engine applications. It features a central combustion chamber and integrated cooling fins designed for efficient heat dissipation and enhanced durability. The unit is precision-machined to ensure optimal performance and reliable operation across a range of small engine environments.

## Technical Specifications

### Port Configuration

- Intake port
- Exhaust port

### Engine Displacement

90 cc

### Material

Cast Aluminum

### Design Features

Central combustion chamber, Cooling fins, Precision machined
