

90HP Crawler Tractor

This crawler tractor features a vertical, direct injection, 4-cylinder, water-cooled engine for strong power and high efficiency. It has planetary differential steering and a ground clearance of 420mm, suitable for paddy field cultivation.

Overview

Versatile crawler tractor designed for demanding agricultural and construction applications.

High-Efficiency Crawler Tractor

The 90HP Crawler Tractor is a professional-grade machine engineered for demanding agricultural tasks and challenging terrains. It features a reliable 4-cylinder, water-cooled direct-injection engine designed for high work efficiency and powerful performance. With a flexible planetary differential steering system and high ground clearance, this tractor is specifically optimized for effective paddy field cultivation and versatile soil preparation.

Engine & Performance

Engine Power

90 HP

Rated Power

66.2 kW

Engine Output

Engine Specifications

4 Cylinder, Direct Injection, Water-Cooled, Vertical

Drivetrain & Mobility

Transmission	8 Forward / 8 Backward gears
Steering Type	Planetary differential steering
Ground Clearance	420 mm

Operational Capabilities

Operational Speed

Direction	Speed Range
Forward	1.22-17.25 km/h
Backward	0.97-13.68 km/h

PTO Speed

- 720
- 1000

Technical Specs

Dimensions (L*W*H)	3690*1770*2400 mm
Machine Weight	2660 kg
Fuel Tank Capacity	80L / 160L
Starting System	Electrical starting
