

9.4x24x13 Ball Bearing

This precision-engineered bearing enables smooth and efficient rotational movement. Its robust design minimizes friction and wear, which extends service life and reduces maintenance.

Product Overview

Precision Engineering for Smooth Rotation

This 9.4x24x13 ball bearing is precision-engineered to provide smooth and efficient rotational movement across a variety of mechanical applications. Constructed from high-quality, durable materials, it is designed to withstand demanding conditions while minimizing friction and wear. Its robust build ensures extended service life and reduced maintenance requirements, making it a reliable choice for machinery and automotive systems.

Dimensional Specifications

Inner Diameter	9.4 mm
Outer Diameter	24 mm
Width	13 mm

Performance Features

Key Benefits

- High-quality material construction
- Minimized friction and wear
- Extended service life
- Reduced maintenance requirements

Typical Applications	Machinery, Automotive Systems, Mechanical Assemblies
----------------------	--
