

967H Wheel Loader for Construction

The 967H wheel loader is a heavy-duty construction machine designed for efficient material handling and loading operations. It features a robust chassis, a powerful engine, and a high-capacity bucket for optimal performance in demanding environments.

Product Overview

High-Performance Wheel Loader

The 967H wheel loader is a heavy-duty construction machine engineered for demanding material handling and loading operations. It features a robust chassis paired with a high-capacity bucket to ensure optimal performance in harsh work environments. With a focus on hydraulic precision and operator comfort, this loader is built to provide long-lasting reliability for construction and mining applications.

Performance Features

Design Highlights

- High breakout force
- Excellent maneuverability
- Robust chassis construction
- Precise hydraulic control system
- Ergonomic operator cabin

Ideal Applications

Construction, Mining, Heavy-duty Material Handling
