

# 996 kg Wheel Loader

The 996 kg wheel loader is a heavy-duty construction machine for efficient material handling. Its hydraulic system offers precise control, while its ergonomic cab ensures operator comfort and safety.

## Overview

### Heavy-Duty Wheel Loader

This 996 kg capacity wheel loader is engineered for high-efficiency material handling across construction, mining, and agricultural sectors. Designed with a robust chassis and a precision hydraulic system, it offers smooth control for loading materials like sand, gravel, and soil. The machine prioritizes operator efficiency through an ergonomic cab layout, ensuring long-term performance in demanding work environments.

## Applications

### Recommended Uses

- Construction sites
- Mining operations
- Agricultural applications
