

9kW Open Frame Inverter Generator

This open frame inverter generator delivers clean and reliable power, featuring a maximum output of 10000 watts and a continuous output of 9000 watts. Equipped with a 459cc OHV engine and inverter technology, it provides stable power suitable for various applications.

Overview

High-Performance Inverter Power

The SC11000IY is a robust open-frame inverter generator engineered to deliver clean, stable power suitable for sensitive electronic devices. Powered by a reliable 459cc OHV engine, it provides a maximum output of 10,000 watts and a continuous output of 9,000 watts. Its versatile design and multiple AC outlets make it an ideal solution for job sites, home backup, and outdoor events.

Performance Metrics

Maximum Power Output

10000 W
Max Output

9000 W
Rated Output

Engine Displacement

459 cc

Engine Type

OHV (Overhead Valve)

Key Features

Key Features

- Inverter technology for clean, stable power
- Open-frame construction for durability
- Multiple AC outlets for versatile connectivity
- Designed for portability and ease of use

Power Quality

Inverter Technology • Clean Power • Stable Output

Applications

Recommended Applications

Job Site, Home Backup, Outdoor Events, Sensitive Electronics
