Overview

High-Energy 9V Power Solution

This 9V battery, available in both 6F22 and 6LR61 formats, is designed to deliver reliable energy for a variety of electronic applications. Featuring a leak-proof design and an aluminum foil jacket, it ensures the safety and longevity of your devices. With an environmentally conscious composition containing 0% mercury and cadmium, this battery meets rigorous international standards for quality and safety.

Technical Specifications

Chemical System	Carbon-zinc (Zn-MnO ₂)
Nominal Voltage	9 V
Shelf Life	3 years
Average Weight	24 g

Compliance & Safety

Heavy Metal Content

1 ppm

Mercury (Hg)

10 ppm

Cadmium (Cd)

40 ppm

Lead (Pb)

Certifications & Standards

IEC Standard, ROHS, EU 2006/66/EC, ISO9001:2000, CE, CQC

Applications

Recommended Applications

- Remote controlled toys
- Remote microphones
- Electronic measurement devices
