Overview

High-Performance Rechargeable Power

This lithium iron battery pack offers a sustainable and economical alternative to single-use dry batteries, designed to last for over 1000 charge cycles. Engineered for devices requiring a 3.2V power source, these batteries provide consistent discharge performance ideal for constant-power electrical appliances. When replacing standard dry batteries, the included battery companion ensures safe and effective operation.

Technical Specifications

Rated Voltage	3.2 V
Capacity	650 mAh
Battery Size	AA 14500
