

AA Alkaline Batteries 1.5V

These are LR6 type AA alkaline batteries with a standard voltage of 1.5V. They have a diameter between 13.5-14.5mm, a height between 49.2-50.5mm, and a weight between 23.5-24.5g.

Product Overview

Reliable Power for Everyday Devices

These LR6 AA alkaline batteries provide a consistent 1.5V output, making them an ideal power solution for a wide range of electronic equipment. Designed to meet standard sizing requirements, they offer reliable performance for both high-drain and low-drain devices. Their versatile nature makes them a staple for professional and consumer-grade electronics.

Technical Specifications

Battery Type	LR6 (AA)
Nominal Voltage	1.5 V
Diameter Range	13.5 - 14.5 mm
Height Range	49.2 - 50.5 mm
Weight Range	23.5 - 24.5 g

Applications

Compatible Devices	CD Players, MD Players, Electronic Games, Camera Flash, Digital Cameras, Remote Controls, Radios, Motorized Toys, Tape Recorders, Cassette Players
