

AA Alkaline Battery - 1.5V

This AA alkaline battery delivers 1.5V of power. It is ideal for toys, remote controls and other electronic devices.

Product Overview

Professional Grade Alkaline Battery

This AA alkaline manganese dioxide battery provides a nominal voltage of 1.5V, making it an ideal power source for a wide range of electronic devices. Designed for long-lasting reliability, it is perfect for everyday applications including toys, remote controls, and flashlights. With a robust shelf life of up to 10 years, these batteries are engineered to perform efficiently in temperatures ranging from -20°C to 54°C.

Technical Specifications

Nominal Voltage	1.5 V
Chemistry	Alkaline Manganese Dioxide (Zn/MnO ₂)
Shelf Life	10 years
Operating Temperature Range	-20 to 54

Logistics and Packaging

Packaging Quantities

Format	Units per Container
Small Package	24
Bulk Carton	720

Weight Details

16 kg Net Weight	17 kg Gross Weight
----------------------------	------------------------------

Available Packaging	Shrink wrap, Small box, Bulk carton
Carton Dimensions	30 x 19.5 x 17.5 cm
