

# AA Alkaline Battery LR6 1.5V

High-performance AA alkaline batteries provide reliable power for various devices. These 1.5V batteries are designed for optimal performance and are free of mercury and cadmium, ensuring environmental safety.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Alkaline Power

These AA (LR6) alkaline batteries are designed for reliable, long-lasting energy output in everyday electronic devices. Featuring a nominal voltage of 1.5V and a capacity of 2450mAh, they provide consistent power for high-drain and low-drain applications alike. Engineered with environmental consciousness, these cells are free from harmful mercury and cadmium, making them a safe choice for professional and consumer use.

## Technical Specifications

Nominal Voltage	1.5 V
Nominal Capacity	2450 mAh
Battery Size	AA (LR6, AM3)
Environmental Compliance	0% Mercury, 0% Cadmium

## Performance Metrics

### Performance Highlights

**88 hours**

Discharge Time (43°C)

**19 hours**

Discharge Time (10°C)

**6.8 hours**

Discharge Time (3.9°C)

## Packaging and Logistics

### Packaging Options

Model	Pcs/Unit	Pcs/Ctn	G.W. (kgs)
LR6-2B	2	240	6.5
LR6-4B	4	480	12
LR6-10B	10	480	12
LR6-24S	24	576	13.8
LR6-48P	48	960	23
