

# AA Ni-MH Rechargeable Battery

AA nickel-metal hydride (Ni-MH) battery with a 1.2V voltage rating. This rechargeable battery has a 1200mAh capacity and provides a reliable power source for various electronic devices.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Ni-MH Rechargeable Batteries

These Nickel-Metal Hydride (Ni-MH) rechargeable batteries are engineered for long service life, capable of delivering over 1,000 charge/discharge cycles or 5 years of standby power under normal use. Designed for high reliability, they feature excellent overcharge performance and stable shelf-discharge characteristics, maintaining approximately 79% capacity after one month of storage. They are an ideal, cost-effective power solution for a wide range of professional and consumer electronic applications.

## Key Features

### Core Advantages

- 1000+ charge/discharge cycles
- Excellent overcharge performance (0.1C for 48 hours)
- Low self-discharge rate
- High operational reliability

### Recommended Applications

Telecommunications, Audio/Video Devices, Lighting, Remote Control Toys, Power Tools

## Technical Specifications

### Model Specifications

Model	Capacity	Diameter	Height
1/3AA	350	14.5	17
2/3AA	700	14.5	29
4/5AA	1300	14.5	43
AA600	600	14.5	50.5
AA1000	1000	14.5	50.5
AA2000	2000	14.5	50.5
AA2600	2600	14.5	50.5

Nominal Voltage	1.2 V
-----------------	-------

Standard Charge Time	15 H
