Product Overview

High-Performance Nickel-Cadmium Rechargeable Batteries

These Nickel-Cadmium (Ni-Cd) rechargeable batteries are engineered for long-lasting performance, offering over 1000 charge/discharge cycles and a 5-year standby life under normal conditions. They feature excellent overcharge resistance, allowing for continuous charging without leakage or deformation, and maintain approximately 79% of their capacity after one month of storage. Ideal for professional applications ranging from telecommunications and power tools to lighting and remote-controlled devices.

Performance Metrics

Cycle Life	1000 cycles
Standby Life	5 years
Self-Discharge Rate	approx. 21% loss after 1 month

Applications

Typical Applications	Telecommunications, Audio/Video Devices, Lighting, Remote Control Toys, Power Tools
----------------------	---

Technical Specifications

Model Specifications

Model	Size	Capacity (mAh)	Voltage (V)
1/3AA	1/3AA	350	1.2
2/3AA	2/3AA	700	1.2
4/5AA	4/5AA	1300	1.2
AA600	AA	600	1.2
AA1000	AA	1000	1.2
AA2000	AA	2000	1.2
AA2600	AA	2600	1.2
