Product Overview

Versatile USB Rechargeable Power

This AA-size Lithium-Ion battery offers a modern, convenient solution for powering a wide range of electronic devices. With an integrated USB charging interface, users can recharge the unit directly from any standard USB port, eliminating the need for bulky external battery chargers. Designed for longevity, this battery supports up to 1000 recharge cycles, making it an efficient and sustainable choice for professional and everyday applications.

Technical Specifications

Energy Capacity

1500 mWh
