

AAA Alkaline Manganese Battery

This cylindrical alkaline manganese battery is available in the AAA (LR03) format. It provides a reliable 1.5V power source and is ideal for low-drain devices like remote controls and toys.

Product Overview

High-Performance Alkaline Power

This AAA cylindrical alkaline manganese battery is engineered for high-drain applications, offering significantly higher capacity than standard carbon-zinc alternatives. Its robust construction ensures structural integrity during use, effectively preventing leakage. Designed for reliability, it serves as an ideal power source for a wide range of electronic devices.

Technical Specifications

Battery Chemistry	Alkaline Manganese
Voltage	1.5 V
Size Format	AAA (LR03)

Compliance & Safety

Environmental Standards	Canadian Environment Act SOR/2014-254, 0% Mercury, 0% Lead, 0% Cadmium
-------------------------	------------------------------------------------------------------------

Applications

Primary Applications

- Toys
- Lanterns
- Shavers
- Remote Controls
