Product Overview

Innovative Rechargeable Power

This AAA Micro USB rechargeable lithium polymer battery provides a modern, eco-friendly alternative to traditional disposable cells. Featuring an integrated micro USB charging port, it eliminates the need for external battery chargers, allowing for direct charging via standard USB cables. Designed for versatility, this battery is an ideal power solution for remote controls, toys, and various small electronic devices, offering consistent performance and long-term cost savings.

Technical Specifications

Output Voltage

1.5 V

Output Voltage

Capacity

400 mAh

Capacity

Battery Chemistry

Lithium Polymer

Charging Interface

Micro USB

Compliance & Quality

Certifications

CE, RoHS

Commercial Terms

Payment Terms

- 30% deposit in advance
- 70% balance before shipment

Sample Availability

Samples are available prior to bulk ordering. Note that sample costs and shipping charges must be paid 100% in advance. Sample pricing may be up to 50% higher than the bulk order unit price.

Logistics

Delivery Timeline

Item	Lead Time
Samples	3 days
