Product Overview

High-Performance Rechargeable Power

These AAA Nickel-Metal Hydride (Ni-MH) rechargeable batteries are designed to provide consistent, long-lasting power for a wide range of daily electronic devices. With a high capacity of 1000mAh and the ability to be recharged over 500 times, they offer a sustainable and cost-effective alternative to single-use batteries. They are ideal for household and professional electronics such as cameras, shavers, toys, game devices, and wireless mice.

Technical Specifications

Capacity

1000 mAh
Rated Capacity

Battery Chemistry	Ni-MH (Nickel-Metal Hydride)
Battery Size	AAA
Voltage	1.2 V

Performance & Durability

Recharge Cycles	500 cycles
-----------------	------------

Compliance & Quality

Certifications	ISO 9001, ISO 14001, SGS CE
----------------	-----------------------------

Usage & Applications

Compatible Devices

- Digital Cameras
- Electric Shavers
- Toys
- Game Devices
- Wireless Mice
- Remote Controls
