

AAA Rechargeable Batteries 1.2V 600mAh

AAA rechargeable batteries have a voltage of 1.2V and a capacity of 600mAh. They are suitable for various electronic devices, including MP3 players, PDAs, and electric toys.

Product Overview

Reliable Power for Everyday Devices

These AAA rechargeable batteries offer a dependable 1.2V power supply with a 600mAh capacity, making them an ideal choice for a wide range of portable electronics. Designed with Nickel-Metal Hydride (NiMH) technology, they provide a sustainable and cost-effective alternative to single-use batteries. They are perfectly suited for powering devices such as MP3 players, PDAs, and electric toys, ensuring consistent performance for your equipment.
