

AAA Zinc Chloride Dry Cell Battery

AAA/R03 zinc chloride battery provides reliable power for remote controls and other low-drain devices. It features a durable metal casing and standard positive and negative terminals.

Product Overview

Reliable Power Solution

This AAA-sized zinc chloride dry cell battery is engineered to deliver consistent 1.5V power for low-drain electronic devices. With a durable construction and a shelf life of 15 months, it provides a dependable energy source for everyday household and office equipment. The product supports OEM requirements, making it a flexible choice for bulk procurement needs.
