

AA/AAA Ni-CD Rechargeable Batteries

These Ni-CD rechargeable batteries are available in AA and AAA sizes. The AA batteries have a 900mAh capacity, while the AAA batteries have a 380mAh capacity, both operating at 1.2V.

Product Overview

Reliable Rechargeable Power

These Nickel-Cadmium (Ni-CD) rechargeable batteries are designed to provide a consistent and reliable power source for a wide range of electronic devices. Available in both AA and AAA formats, they offer a sustainable alternative to single-use batteries for professional applications. With a standard 1.2V output, these cells are engineered for durability and repeated use in various equipment.

Technical Specifications

Capacity by Size

900 mAh
AA Capacity

380 mAh
AAA Capacity

Available Sizes	AA, AAA
Nominal Voltage	1.2 V
Battery Chemistry	Ni-CD (Nickel-Cadmium)

Usage Information

Typical Applications

- General electronic devices
- Rechargeable power source applications
