

Abrasive and Grinding Material Assortment

This assortment includes abrasive and grinding materials in various forms such as powders and aggregates. These materials are suitable for grinding, polishing, and surface preparation applications.

Product Overview

Professional Abrasive Assortment

This comprehensive assortment of abrasive and grinding materials is designed for versatile surface preparation, polishing, and industrial grinding applications. The collection features a variety of powders and aggregates with distinct textures and compositions, catering to diverse finishing requirements. Packaged for clarity and quality assessment, these materials are suitable for professional workshops and manufacturing environments requiring precise surface treatment.

Material Characteristics

Primary Applications

- Surface preparation
- Industrial grinding
- Polishing
- Finishing

Available Forms

Powders, Aggregates, Granular

Quality & Presentation

Diversity

Multi-texture • Multi-composition

Packaging

Glass containers for material visibility and quality control
