

Abrasive Blasting Cabinet for Surface Preparation

This self-contained abrasive blasting system is designed for efficient material cleaning, etching, and surface preparation. It features a fully enclosed cabinet with integrated gloves and a viewing window for safe operation.

Overview

Professional Surface Preparation

The SBC220B is a high-performance, self-contained abrasive blasting cabinet engineered for precision cleaning, etching, and surface preparation. Its fully enclosed design ensures safe operation while providing excellent visibility through an integrated viewing window. This versatile system is an ideal solution for professionals working in automotive restoration, metal fabrication, and general parts cleaning.
