

Abrasive Blasting Cabinet for Surface Preparation

This abrasive blasting cabinet is a fully enclosed system for cleaning, etching, and surface preparation. It features a viewing window, integrated gloves, and a powerful abrasive delivery system.

Product Overview

Professional Surface Preparation Solution

The SBC350 abrasive blasting cabinet provides a reliable, fully enclosed environment for effective cleaning, etching, and surface preparation. Engineered with a heavy-duty steel construction, it offers the durability required for industrial workshops while maintaining a compact footprint. Users benefit from enhanced safety and control features, including integrated gloves and a large viewing window, ensuring precise results across a variety of material types.
